## SUITABLE FOR:

Potholes

Patches

Trenches

Core  
reinstatements

Roads

Footpaths

Residential  
Siteworks

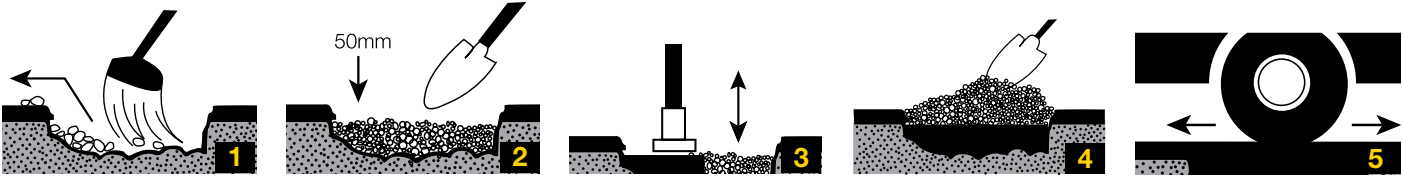

Concrete &  
Asphalt

Also available in bulk bags and loose bulk.

### INSTRUCTIONS FOR USE

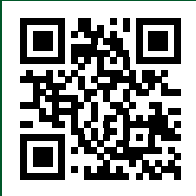

1. Clear pothole of loose debris and excess water to give clean solid supporting edges.
2. Add a 25mm to 50mm layer of UltraPatch.
3. Compact thin layers with a hand tamper or use a plate compactor for heavy trafficked areas.
4. Repeat steps 2 and 3 until the repair is at the required level.
5. Surface can be used immediately after placement.

### Quick tips:

- The optimum thickness of UltraPatch is 50mm.
- If using UltraPatch for a road repair, ensure compacted product is 10mm above surrounding surface.
- If minor settlement occurs over time due to soft base materials, add UltraPatch to return to the required level.
- It is best to lightly dust the surface with sand if repair is to be trafficked immediately by turning vehicles.
- Contact Boral for advice prior to applying UltraPatch in works with dimensions greater than 2 metres in length or breadth, or repairs deeper than 150mm.

### Coverage

Thickness of compacted asphalt repair				
One tonne of UltraPatch will cover the following area.	25mm	40mm	50mm	75mm
Area (m <sup>2</sup> )	16-18	11-13	8-9	5-6

UltraPatch is available in a range of convenient sizes:

## SAFETY

UltraPatch is handled and applied at ambient temperatures so there is no risk of skin burns. Unlike most cold mix asphalt, Boral UltraPatch does not contain toxic solvents which can be harmful to workers and the environment.

Please wear gloves and ensure adequate ventilation when handling and placing UltraPatch.

A safety data sheet is available at [www.boral.com.au/asphalt](http://www.boral.com.au/asphalt)

## STORAGE

UltraPatch should be kept in original packaging and out of reach of children. UltraPatch can be stored for up to two years.

During storage a crust may harden on the surface. To restore workability, tip UltraPatch onto a clean surface and manipulate.

The particular circumstances of asphalt projects, including site conditions, equipment and weather can vary significantly and dictate the use of particular materials and techniques to address challenges presented by those circumstances. The application guide should be viewed as a general reference only. Boral recommends you seek professional advice tailored to your project before using this product.
